Huijue Optoelectronics Silicon Photonics Technology

Overview

Silicon photonics has developed into a mainstream technology driven by advances in optical communications. The current generation has led to a proliferation of integrated photonic devices from t.

Huijue Optoelectronics Silicon Photonics Technology

	In this paper, we discuss a packaging technique where 2D structures, on a common silicon photonics interposer/substrate, are interconnected with other silicon devices via a package substrate.
	Silicon Photonics Chip I/O for Ultra High-Bandwidth and Energy-Eficient Die-to-Die Connectivity
	We present our work in the area of heterogeneous optical integration, where separately manufactured electronic components are assembled on to an active silicon photonics interposer to ...
	We chart the generational trends in silicon photo-nics technology, drawing parallels from the generational definitions of CMOS technology. We identify the crucial challenges that must be...
	The investigated devices aim to expedite the transfer of silicon photonics from academia to industry by opening the next phase in on-chip silicon photonics and enabling the application of silicon ...

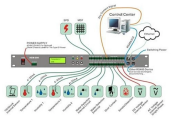
We describe how silicon photonic circuits can be used to perform unitary matrix operations and unscramble the different data lanes in multichannel optical communication systems.

Basic Concept of Silicon Integrated Photonics Plug-and-Play: silicon photonics module converts electronic data to photons and back again. Silicon circuitry helps optical modulators encode ...

Now he is a professor at Wuhan National Laboratory for Optoelectronics, Huazhong University of Science and Technology, China. He has been engaged in silicon-based optoelectronics and ...



Commercial adoption of flatland optoelectronics has already begun, from liftoff GaAs thin-film solar cells to integrated graphene photonic transceivers and modulators. However, substantial ...

Abstract: The performance of silicon photonic components and integrated circuits has improved dramatically in recent years.
