1v32 beam splitter

	Large beam size optical set up. Used in large beam size optical layouts. Used for monitoring optical systems, split beams into different wavelengths, polarizations or intensities.
	Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...
	Beamsplitters are available in various thicknesses from 0.5 to 3.0mm, for specific wavelength ranges from visible to IR, and in various transmission/reflection ratios. ...
	PLC Splitters are Singlemode splitters with an even split ratio from one input fiber to multiple output fibers. This PLC Splitter is a 1x32, with 1 input and 32 output fibers with an even split ratio across all ...
	Bare Fiber 900um PLC Splitter — 1×32 Single Mode In-Line Module Fiber Splitters #FS-LH-132-BB-NN-C Bare Fiber 900um PLC Splitter — 1×32 Single Mode PLC (planar lightwave circuit) splitter 1x32 ...

Beamsplitters operate by splitting light based on reflection/transmission (R/T) ratios or specific properties like polarization or wavelength. Available in cube and plate configurations, these versatile ...

Dichroic Beamsplitters, which split light by wavelength, are often used as laser beam combiners or as broadband hot or cold mirrors. Non-Polarizing Beamsplitters, ideal for laser beam manipulation, split ...

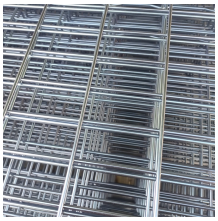

Shop DigiKey''s large in-stock selection of Beamsplitters. View inventory, pricing and order now for same day shipping!

LightMachinery''s range of beam splitters includes polarizing and dichroic. We make custom beam splitters to fit your unique specifications. Learn more!

FS PLC Fiber Optic Splitters, Bare/Blockless/ABS/LGX Splitter/Rack Mount Types, support 1xN light distribution, with low IL and PDL for high-reliability transmission.

Our expert technical staff will guide you through the many options we offer, ranging from custom split ratios, unique materials, and custom coatings to unusually large or small dimensions.

PLC (Planar Lightwave Circuit) splitters are Single Mode Splitters with an even split ratio from one input fiber to multiple output fibers. It is based on planar lightwave circuit technology and provides a low ...

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

A beam splitter (or beamsplitter, power splitter) is an optical device which can split an incident light beam (e.g. a laser beam) into two (or sometimes more) beams, ...

The 1×32 Steel tube PLC Splitter devices have high performance in terms of low insertion loss, low PDL, high return loss, and excellent uniformity over a wide wavelength range from 1260nm to 1650nm and ...
