

**Aerospace Electronics Active Optical  
Cable Silicon Photonics Customs  
Clearance Agent**

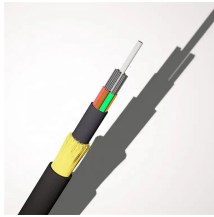

## Aerospace Electronics Active Optical Cable Silicon Photonics Custom

Rear of the optical fiber distribution box

OFS specialty optical fibers can be customized to meet your desired specifications with state-of-the-art coatings, buffers, and cabling materials resistant to abrasion, chemicals, radiation, biological ...

Our active optical cable assembly portfolio provides greater cable flexibility and longer reach, as compared to both traditional passive copper solutions and emerging active copper (ACC/AEC) ...

Draco Electronics is a custom cable assembly specialist, providing turnkey solutions to demanding users in aerospace, consumer electronics, commercial electrical device, medical, automotive, military and ...

ACP's capabilities have been exceeding your most demanding OEM passive component challenges with complex and effective solutions. We excel at designing photonic solutions across the most ...

From structural hardware on NASA's Space Launch System to global communications infrastructure, RF electronics, and space-qualified optical materials aboard Orion, Teledyne businesses contribute ...

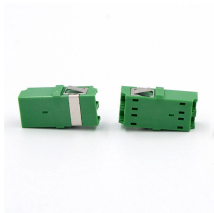

Molex's Active Optical Cables (AOC) offer significant cost advantages over traditional optical modules. Additionally, AOCs can easily be substituted by interfacing to systems via a broad range of standard ...

To compare the benefits with conventional electrical transmissions, optical approach performs more advantages in broad bandwidth, high speed, better efficiency, and low noise.

Amphenol offers a range of hermetically sealed connectors, high speed fiber optics, ruggedized assemblies and more that excel in the extremely harsh environment of space.

Silitronics is your trusted one-stop partner for advanced semiconductor and photonics packaging—pushing the boundaries of design, fabrication, and assembly while driving sustainability.

We are located in Fremont, CA. We design and sell optical transceivers, optical modules, Modular TDCM+EDFA Platform, 100G, 400G and 800G PAM4 Transceiver Applications. We have our own ...

## Contact Us
