Aggregator Switch in pinyin

Overview

An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers. Hi, I got a very good offer to buy the Aggregation Switch. I thought, perfect tool! I can connect my UDM Pro, NVR and USW Pro with 10g. and have capacity for future devices with 10g capacity (like a NAS). By bundling multiple network connections into a single high-bandwidth link, aggregation switches help. Developed for long distance fiber installations. Faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity. It essentially acts as a traffic cop.
