All lights on the PoE switch are on

Overview

PoE mode is enabled, and the port LED displays green when the switch port is providing power. PoE port is denied power because providing power to the powered device exceeds the switch . The lights on POE switches mainly include power indicator lights, system operation status lights, POE mode status lights, and business interface indicator lights. Their meanings are as follows: Power indicator light (PWR): Green constantly on: indicates that the power supply of the switch is normal. This guide is for troubleshooting Power over Ethernet (PoE) in the Catalyst 3750-E, 3750, 3560-E, and 3560 switch product families. Port LEDs function as described in Port LEDs and Modes, on page 3. However, when PoE fails, it can disable critical infrastructure like IP phones, wireless access points, and security cameras.
