Applications of Ukrainian Relay Protection Testers

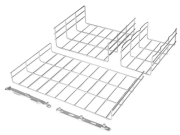

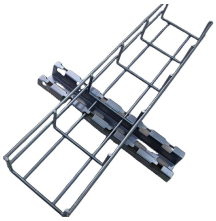

Overview

It is relevant for examination and testing of secondary and primary equipment (with additional devices) in power industry, railways, petroleum industry or in the other power-consuming industries on the projects with 0,38-750 kV. Application field: manual and automated test and setup of all. The company LLC " EKNIS" performs a full range of works on commissioning and modernization of Relay Protection and Automation and Emergency Control Automatics equipment in operation at power plants and substations with a voltage of 6-750 kV: - service maintenance. We use the equipment of leading. Welcome to Detec Technologies, the international headquarters and business development hub for our specialized engineering tandem. By combining the decades-long manufacturing heritage of DTE-ENERGY (Ukraine) with the global operational standards of Detec Technologies (USA), we provide energy. Commissioning works are the complex set of adjustment works and tests. Get familiar with the reproduction of the distance zone shape of your application. This system is a hardware-software complex consisting of a special GRAN Test System software, which is installed on a PC, and a microprocessor device “RPA-Tester” (manufactured by.
