

Bolivian Railway Industry Switches

Overview

Bolivia launches a massive rail reform to cut logistics costs, boost cargo trade, and expand luxury passenger trains for a 2026 tourism revolution. The Bolivian rail network is made at present of two separate systems, one in the eastern lowlands centered on Santa Cruz and one centered along a north-south axis along Altiplano plateau and with multiple branch lines. The network has had a varied development throughout its history but contrary. In 2024, Bolivia continued to rely on railway switch imports, with top exporting countries being Brazil, Finland, USA, Germany, and Poland. Despite high concentration with a high Herfindahl-Hirschman Index (HHI), the market showed significant growth with a CAGR of 19. However. A transformative era for South American transportation is currently being initiated as the Bolivia rail reform plan seeks to modernize a vital national asset. It is observed that the government is moving to expand the national rail system with the primary objective of creating a network that is. BOLIVIA's two rail networks, one in the western and Andean part of the country and the other in the eastern lowlands, formed part of Bolivian National Railways (ENFE) until being split into separate companies, initially both state-owned, towards the end of 1995. A controlling
