

Broadband fiber optic access

Overview

Fiber internet is a broadband connection that runs on light signals from fiber-optic cabling, delivering multi-gig upload and download speeds. It's the fastest and most reliable internet you can get, and most plans come with straightforward pricing and included Wi-Fi equipment. The FCC National Broadband Map displays where Internet services are available across the United States, as reported by Internet Service Providers (ISPs) to the FCC. The map will be updated continuously to improve its accuracy through a combination of FCC verification efforts, new data from Internet. The Spectrum network combines fiber technology with an advanced HFC infrastructure to deliver fast, consistent performance across the country for homes and businesses. Spectrum uses a Fiber broadband network, nationwide 5G and Advanced WiFi to keep you connected. Use the map controls to color by number of fiber providers or by maximum fiber speed available.

Broadband fiber optic access
