CWDW Optical Module

CWDM Optical Module

Simply put, CWDM is equivalent to "opening up multiple lanes" for optical fiber. Each "lane" corresponds to a wavelength and can carry different business signals (such as data, voice, ...

CommScope's CWDM Modules are part of our value-added module (VAM) system that provides flexibility, scalability and functionality to an optical transport system.

A CWDM SFP module is an optical transceiver that uses Coarse Wavelength Division Multiplexing (CWDM) technology to transmit multiple data channels over a single strand of single-mode fiber, ...

The Cisco CWDM Solution offers a convenient and cost-effective solution for the adoption of optical Gigabit Ethernet in campus, data center, and metropolitan-area access networks.

SFP+ transceiver for CWDM that supports 10G connections up to 20 km using single-mode fiber with a duplex LC UPC connector.

Corning's coarse wavelength division multiplexers (CWDMs) are integrated optical modules that mux or demux multiple optical signals of different wavelengths in a single fiber.

Explore the ultimate guide to optical modules. Learn types, functions, performance metrics & how to choose the right module for your fiber network.

Optiworks' coarse wavelength division multiplexer (CWDM) is designed and integrated optical modules that Mux or Demux multiple optical signals of different wavelengths in a single fiber, manufactured as ...

Built with GF's advanced silicon photonics technology, the SCALE CPO solution utilizes both coarse and dense wavelength-division multiplexing (CWDM, DWDM) for bi-directional data ...

FS passive CWDM mux demux (4-18 channels) greatly saves optical fiber resources for scalable OTN systems with full use of coarse wavelength division multiplexing (CWDM) tech.
