Can TP-Link be plugged into an optical module

Overview

The SFP+ port is a high-speed optical-to-optical signal conversion port, mainly used for 10G Ethernet and Fiber Channel network applications. A key advantage of SFP+ Modules is that they are "hot-swappable", meaning they can be swapped out while the router is still powered on. They also support. The SFP/Media Converter are designed for easy use for optical fiber transmission. Installation Guide, we need to do some troubleshooting. Basic checking: LED status; the suitable fiber/Ethernet cable; the wave 2. The TL-SM5110-SR is compatible with any device with a 10G SFP+ interface – switches, routers, servers, media converters, etc.
