

Carrier Backbone Network Grade Industrial Switch LPO Selection Guide

Carrier Backbone Network Grade Industrial Switch LPO Selection Guide

Within a PBB network, frames are switched according to the destination backbone switch MAC. The main advantage of this approach is the complete separation of customer and carrier domains, ...

Switches are active network components that support the structuring of an industrial communication network into electrical or optical line, star and ring structures.

non-blocking speed on all ports and 802.1p QoS Traffic Prioritization. Magnum 6K16s are “plug-and-play” ready for use as backbone switches where a mix of bursty data traffic and priori.

With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these ...

REP (Resilient Ethernet Protocol) A ring protocol that allows switches to be connected in a ring, ring segment or nested ring segments. REP provides network resiliency across switches with a rapid ...

Our Industrial Ethernet Switch portfolio comprises Managed and Unmanaged Switches with Gigabit, PoE, IEC 61850 certification, and for DIN rail mounting.

H3C's Intelligent SDN Network Solution utilizes an intelligent network control layer to achieve smart management and intelligent operations for the network. Through northbound interfaces, it presents ...

This guide provides a practical, standards-based approach to selecting managed industrial Ethernet switches and designing robust OT networks. It covers port configuration, VLAN ...

VVDN helps network equipment manufacturers to build their own carrier-grade Layer 2/Layer 3 switch solutions from managed switches to unmanaged switches, enterprise switches to industrial switches, ...

Our switches are built for high network flexibility, cyber security and durability and are suitable for use in mission-critical environments.
