Composite optical cable OPLC24

OPLC Fiber Composite Low-Voltage Cable is a type of composite cable that combines optical fiber light with low-voltage cable, it has the dual function of power transmission and communication and can be ...

Available in 4 to 24 fiber core configurations—such as 24-core variants with dual copper power wires—this cable supports diverse transmission technologies including single-mode and multi-mode ...

We are a source manufacturer, dedicated to research and development, and expertise in optical fiber cables and network cables production. OUFU has fully introduced the ISO quality management ...

Network cable type: Optical Cable Length: 1m,3000m (detachable) Color classification: National standard 2*1 5 4 core National standard 2*1 5 8 core National standard 2*1 5 12 core National ...

It is a high-tech enterprise mainly engaged in R & D, production, sales and service in the field of optical fiber communication. The company mainly produces OPGW optical cable, FTTH cable, ADSS optical ...

	It is a cable that combines optical units into low-voltage power cables, with the ability to transmit power and optical communication, suitable for rated voltage levels of 0.6/1.0kv and below.
	It can solve broadband access problems, power supply of equipment, transmission of emergency signals, performs data transmission, voice, video all this transparent.
	Green and safety performance is superior. The optical unit is compatible with the long-term working temperature of the power cable. The cost of OPLC is less than 10% higher than that of the traditional ...
	Optical fiber composite insulated power cable for low voltages (OPLC) is a new type of photoelectric composite cable for low voltage power lines, and has double functions as ordinary low voltage cable ...
	Optical fiber composite insulated power cable for low voltages (OPLC) is a new type of optical fiber composite cable for low-voltage power lines. It has the functions of ordinary low-voltage cables and ...
