

## Corrosion-resistant cable tray installation in Guinea

## Corrosion-resistant cable tray installation in Guinea

This document provides details on installing cable trays and their support systems. It includes diagrams showing how to mount cable trays on walls using pre-fabricated flanges or channels.

All trays must undergo salt spray tests and coating thickness tests to ensure the coatings meet the durability levels required under the IEC standard for cable tray.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Trays shall be stored on flat surfaces with adequate support, off the ground, in a dry, shaded area. Accessories shall be stored in labeled containers or shelves for easy identification and access. ...
