Custom CFP8SFP

	The CFP8 form-factor, a definition of the CFP MSA, is fundamentally dissimilar than QSFP-DD and OSFP: The CFP8 is meant for transmission application, with its wide-spread footprint ...
	CFP8 use of a 16x25G electrical interface provides first-to-market advantage for the CFP8. If 50-Gbps electrical signaling or optical assemblies are not available from the industry in a timely fashion, a ...
	Ordering Information — QSFP, CXP and CFP Cables note that additional lengths, styles and custom cables are available, please contact Mol
	The OSFP is a new pluggable form factor with eight high speed electrical lanes that will initially support 400 Gbps (8x50G). It is slightly wider and deeper than the QSFP but it still supports 32 OSFP ports ...
	Custom labels for easy identification to help ease receiving, stocking and deployment. Choose suitable options based on your applications. Ensure high quality products with state of testing facility.

Refer to the latest revision specification of the SFP small form factor pluggable module.

Advantages Up to 112G PAM4/64G-NRZ/56G-NRZ per differential pair Current Capacity up to 2.2A for latest generation of DCO Connector, plug and mechanical sets available Custom-made cages and ...

400G CFP8 (Eight Channel Form Factor Pluggable) optical transceiver module is designed for use in 400 Gigabit Ethernet interfaces over single-mode fiber (SMF). It is defined by ...

dBm 3.5 Notes: Average launch power, each lane (min) is informative and not the principal indicator. of signal strength. A transmitter with launch power below this value cannot be compliant; however, a ...
