

## Customized Process for 800mm Depth of Telecom Shelter

### Overview

When designing and fabricating our telecom shelters and enclosure solutions, the American Products team must adhere to a variety of codes and regulations. These range from defining the spacing of railings to guiding how we build our shelters. Our shelters can be shipped nationwide. Used to safeguard sensitive telecommunication equipment from the surrounding environment, telecom shelters are small independent. While our shelters listed below come with standard equipment or sizes, we also take a project-by-project approach and can easily modify widths and depths or customize equipment packages and options. N/A Constructed in Size at 20 ft. N/A 30"x36" Equipment Mounting. Module X Solutions designs, engineers and manufactures modular and build on site precast or lightweight steel telecommunication equipment shelters to industry and client specific requirements. Above all, we also create optimum solutions for our customers.
