

DC power supply unit for data centers IP65

The iBAN Power OPS6000 is a 48V DC power system designed for outdoor telecom sites such as micro base stations, RRUs, and smart traffic nodes. It features an IP 65 -rated aluminum enclosure ...

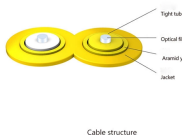

FEAS offers power supply units of different technologies as cable versions. Thanks to full casting resin encapsulation and reliably sealed cable inputs and outputs and LEDs, all these power supplies meet ...

This AC/DC Power Supply unit is compatible with 480Y/277V AC @ 47-440Hz input voltage and provides 28V DC output voltage. Equipped with protective functions. This power supply is compatible ...

Each product is Hermetically Sealed and carries an IP65 rating for ingress of dirt/dust and water. The products are cooled via natural conduction/convection (no air flow needed) and supported by ultra ...

IT6600C series is not only a power supply, but also an excellent electronic load. It can not only output power as a DC power supply, but also act as a DC electronic load, absorbing power and feeding ...

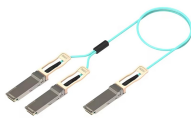

Reliable power supplies for data centres. Discover DC power solutions and UPS systems built to ensure uptime in critical infrastructure.

A wide variety of power solutions exist for non isolated DC/DC rails. You can choose from power modules with integrated inductors, metal-oxide semiconductor field-effect transistors (MOSFETs) and ...

Our product offering covers the AC-DC frontend as well as the DC-DC backend power distribution with several options available to customize and optimize the design for the specific needs of the application.

Mouser offers inventory, pricing, & datasheets for IP65 Power Supplies.

Each product is Hermetically Sealed and carries an IP65 rating for ingress of dirt/dust and water. The products are cooled via natural conduction/convection (no air flow needed) and supported by ultra ...
