Detailed Specifications of PZ30 Distribution Box

	PZ30 distribution box is a modular terminal combination electrical appliance, which is suitable for single-phase three-wire or three-phase five-wire terminal circuits with rated voltage of 220V or 380V AC and ...
	PZ30 is a 9mm modular modular distribution box, which is a low-voltage terminal power distribution equipment. It is suitable for AC 50Hz, 220V/380V (single-phase three-wire / three-phase five-wire) ...
	The PZ30 lighting distribution box is suitable for single-phase and three-phase circuits with a frequency of 50 Hz, a rated voltage of 500 V and below, and a load current not exceeding 100 A.
	This product is suitable for single-phase three-wire or three-phase five-wire terminal circuits with AC frequency of 50Hz, rated working voltage of 220V or 380V, and rated current not exceeding 125A., ...
	This empty box is specially designed for installing circuit breakers and leakage protectors, offering centralized and safe power distribution and component protection for residential electrical systems.

PZ30 lighting distribution box is suitable for frequency 50HZ, rated voltage 500V and below, load current is not greater than 100A single-phase and three-phase circuits, for power and lighting, motor control, ...

PZ30 distribution box /distribution board The series products are made of standard cold-rolled steel and use powder-coating techniques to process the crust. The outlook is beautiful and fit for surface and ...

LPZ30 modular terminal combined distribution box is suitable for single-phase three-wire or three-phase five-wire terminal circuits with AC 50Hz, rated working voltage up to 400V and below, and total ...

The PZ30 series distribution box features a compact structure, easy installation, good protection and safety performance, reasonable wiring space, compliance with national standards, and the ability to ...
