

## Fiber Optic Cable Service Life Regulations

### Overview

The FCC's rules and regulations are located in Title 47 of the Code of Federal Regulations (CFR). This section covers Agency requirements for fiber optic service entrance cables intended for aerial installation either by attachment to a support strand or by an integrated self-supporting arrangement, for underground application by placement in a duct, or for buried installations by trenching. Fiber optic cables are a critical component in modern networks, with their performance directly affecting the stability of data centers and enterprise networks. Effective lifecycle management of fiber optic cables, from selection and installation to daily maintenance and replacement, is essential.
