Connect your receive reference jumper (also called a tail cord) to the power meter. Finally, connect the cable you want to test between the launch jumper and the receive jumper.

The Corning Quick Connect program offers a 2-day lead time for our EDGE Uniboot Jumpers, with a 90% delivery guarantee. Corning offers the most complete line of ...

It should only be used when the standard-1 jumper method is not feasible, such as when the connector type on your tester interface does not match the connector type of the link under test. ...

For insertion loss testing, this requires reference launch jumper cables to connect the test source to the fiber in the cable under test and receive cables to connect the fiber optic power meter.

We test 100% of our jumpers for proper end-face clarity, insertion loss, and return loss to provide superior optical performance. Our Fiber optic assemblies are available in a wide variety of fiber ...

If you''re in the market for a fiber optic jumper, our interactive online configurator will allow you to build your own, so you can see how the assembly will look and function before you even request a quote. ...
