

Fiber optic routers have long internet access times

Overview

Fiber internet speeds are limited by your router's Wi-Fi standard. But here's the rub: If you plan to use a wireless router to connect to the internet over Wi-Fi, you're going to want one that can actually offer speeds that match your lightning-quick optical line. In other words, you'll need a newer router that can handle high speeds with Wi-Fi 7 to go along with. Making the switch to fiber is a major upgrade, and it's often marketed as the ultimate internet experience. The fix-it for every connection problem you've ever heard of. Well, that wasn't my experience. When your fiber connection feels sluggish, it's frustrating, especially when you're paying for it. It has the best Wi-Fi speeds, supports 10Gbps internet, and packs free features like security and parental controls. It comes with a five-year guarantee too. Regarding the router, did you all change yours?

The hyperoptic one is like a massive prehistoric stone slab.
