This heavy-duty laminated card contains an indicator swatch for identifying the presence of non-visible infrared light (but it works with 850nm multimode wavelengths as well).

Each card has a dedicated output port for viewing full-motion video from fiber or coax without loading the bus. The cards capture video and header information over the ...

These are reliable and easy-to-use devices that have high power, can automatically adjust to real-time conditions, and have a straightforward display that eliminates any guesswork. This series is able to ...

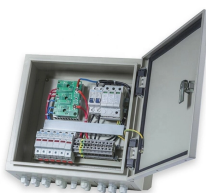

This heavy-duty laminated card contains an indicator switch for ...

Single-port, simultaneous dual-wavelength feature completes testing in half the time and saves measurements from both wavelengths into one record; Additional wavelengths of 1490 a

Standard cylindrical fiber sensor heads The standard cylindrical fiber optic sensor heads provide reliable object detection, easy installation and long sensor lifetime for all general applications.

This 3U VPX solution is ideal for C5ISR applications involving low-latency data processing, at-the-edge computing, digital signal processing (DSP), and other high-performance ...
