Guatemalan Liquid-Cooled Switch LPO

Overview

LPO modules reduce per-pluggable power from ~30W with DSP-based optics to ~10W, enabling up to 50% system-level savings. Early tests show good receiver performance even under degraded conditions, though transmit paths remain sensitive to reflections and crosstalk at the connector. The demonstration showcases the next generation of high-performance connectivity, featuring support for cutting-edge 200G-per-lane 1. 6Tbps Linear Pluggable Optics (LPO), Linear Receive Optics (LRO) Fully Retimed Optics (FRO), It highlights seamless interoperability between advanced 1. 6T optics and. Amphenol XPO-LPO optical transceiver delivers next-generation 12. 8T Ethernet connectivity with 224 Gb/s per lane. Leveraging LPO technology, the module provides ultra-low-latency, power-efficient optical links tailored for AI, high-performance computing, and hyperscale data center applications. Cisco is actively innovating in direct-to-chip liquid cooling for high-performance switches, laying the groundwork for solutions that will enable seamless and. Arista Networks co-founder Andreas Bechtolsheim used his keynote at IEEE Hot Interconnects 2025 to highlight how Linear Pluggable Optics (LPO) and new rack designs can dramatically cut power consumption in AI-scale
