Gyta outdoor single-mode optical cable

	GYTA armoured fibre optic cable feature stranded loose tube filled with a water-resistant filling compound. A steel wire, sometimes sheathed with polyethylene (PE) for cable with high fibre count, ...
	The fibers, either single-mode or multi-mode, are positioned in a loose tube made of a high-modulus polyester material. The tubes are filled with a water-resistant compound.
	Buy Fiberhome 12-core single-mode stranded armored fiber optic cable GYTA-12B1.3 for outdoor aerial pipeline and carrier-grade telecom networks. Durable aluminum tape armoring and high-performance ...
	Tubes (and fillers) are stranded around the strength member into a compact and circular cable core. An Aluminum Polyethylene Laminate (APL) is applied around the cable core, which is filled with the ...
	Outdoor single-mode GYTA optical cable is a versatile and robust type of optical fiber cable designed to provide reliable and high-performance communication in outdoor and harsh environments.

Main products are optical fiber cables, data cables, communications cables etc. Its yearly productive capabilities are 4 million core kilometers, 0.5 million boxes, and 6 million pair kilometers respectively.

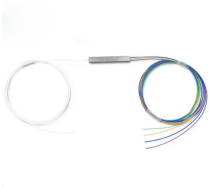

GYTA stands out as an outdoor communication optical fiber cable. Full cross-sectional water-blocking structure with special oil paste filling in the loose tube to ensure good water and ...

Durable GYTA armored fiber optic cable for outdoor use. Features low dispersion, moisture resistance, and wide temperature range (-40°C to +60°C).

The GYTA outdoor fiber cable is built using single-mode or multi-mode optical fibers, ensuring low signal attenuation and high-speed data transfer over long distances.

Durable GYTA outdoor fiber optic cable with aluminum tape layer, UV-resistant, moisture-proof, ideal for aerial/pipeline installations. Custom lengths & OEM options available.

Main products are optical fiber cables, data cables, ...
