H3C Switch Zero-Latency Access

	H3C S5130S-EI series switch uses professional built-in surge protection technology and supports the industry-leading 10KV service port surge protection capability, which greatly reduces the damage ...
	H3C S6805 series switch support Priority-based Flow Control (PFC), Enhanced Transmission Selection (ETS) and Data Center Bridging eXchange (DCBX). These features ensure low latency and zero ...
	Utilizing industry-leading ultra-low latency components and technologies, the switches achieve ultra-low latency forwarding between ports; signal detection technology ensures reliable signal transmission ...
	The H3C S6116-48X switch stands out from competitors with its low latency performance, high port density, and advanced management features, offering superior network efficiency and reliability.
	Learn about H3C switches with our comprehensive guide. Understand their features, benefits, and how to configure them for efficient and reliable network performance.

H3C industrial switches can operate in -40°C - 75°C environments for a long time, and use industrial components to reach IP40 rating. At the same time, with shockproof, anti-electromagnetic ...

RoCEv2 (RDMA over Converged Ethernet version 2) has emerged as the go-to protocol for building lossless Ethernet networks that deliver ultra-low latency, massive throughput, and ...

By concentrating on high-throughput interfaces and low-latency switching fabrics, H3C enables scalable capacity without compromising reliability or operational simplicity. Enterprises pursuing scalable ...

H3C S6850 switch series support Priority-based Flow Control (PFC), Enhanced Transmission Selection (ETS) and Data Center Bridging eXchange (DCBX). These features ensure low latency and zero ...

H3C S9820 series switches support Fiber Channel over Ethernet (FCoE), which permits storage, data, and computing services to be transmitted on one network, reducing the costs of network construction ...
