

How are the data centers doing

Overview

Data centers, which house computer systems that help train AI models, are blanketing the country, a boom fueled by surging interest in AI and state tax breaks. More than 4,000 are already in operation, mostly in Virginia, Texas, and California, and 3,000 more are being planned or under. OAKLAND, Calif. 13, 2025 /PRNewswire/ -- Pacific Gas and Electric Company (PG&E) is working to serve approximately 5.5 gigawatts (GW) of new data center energy demand over the next decade, with 1.4 GW currently in final design and projected to come online between 2026 and 2030. Michael is the CEO of Cleanview. On this page, you can. Data centers in California are boosting the state's AI infrastructure through several upcoming data centers, such as the Goodman Group Silicon Valley Data Center, Prime Data Centers Sacramento Data Center, and Amazon East Gilroy Data Center. While Silicon Valley is leading the AI revolution, it's a different story when it comes to the data centers that power tools like ChatGPT.
