How many fiber optic routers can the company support

Overview

Consumer-grade routers handle about 20 to 50 devices comfortably, while higher-end or business models can manage 100 or more. What limits performance isn't just the number of devices but how they use the network. Your speed, the size of your home, your router and your level of connectivity will all factor in to how well your devices perform. How many devices you have The average home has over 20 online devices. But, in transitions, exactly how many devices can you connect?

The short answer is: I hope that helps and there is a lot more!ATT fiber provides high speeds for internet service connections with the help of fiber optic technology. The maximum device capacity varies depending on the router's hardware specifications, Wi-Fi® standards, and intended use case. Understanding the capacity of your router is crucial for ensuring optimal network. Modern fiber routers incorporate advanced features like WiFi 6 or WiFi 7 technology, delivering faster wireless speeds, better device handling, and improved coverage compared to older standards. Running on Cisco IOS XE Software, the Cisco ASR 1002-HX supports software redundancy without
