How much does a NEMA4X micro-module data center cost

Overview

A 2025 US development cost guide from Cushman & Wakefield reports facility construction costs clustering around $9. 0M per MW of critical load across major US markets, with an average near $11. The key is understanding that its cost isn't a one-size-fits-all number—it depends on your unique needs, but there are predictable factors and verified savings that make it easier to plan. First: What Even Is a Micro Modular Data Center?

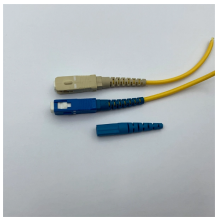

Before we dive into costs, let's make sure we're on the same. Here's the uncomfortable truth about modular data center cost: there isn't one. markets, including building, material, land and labor costs, material and equipment lead times, labor availability, and more. Power Challenges in Established Markets: Limited power availability is pushing data center developments. Building a data center requires a hefty upfront investment, often exceeding initial estimates, driven by land, essential systems, and unpredictable construction costs. Operational costs for modern data centers can range from $10 million to $25 million annually, heavily influenced by power. Mini Data Center-A micro data center (MDC) is a low-scale highly modular data center that includes all
