

How much should a terminal box installation cost

Overview

For a straightforward installation of a single standard box in an accessible location, homeowners often see \$120-\$260. Projects involving new or upgraded circuits, larger panels, or difficult access commonly run \$800-\$1,600, with high-end setups surpassing \$3,000 in some. Homeowners typically pay a broad range for electrical box installation, driven by box type, wiring complexity, and local labor rates. Typical costs are driven by box type, material (plastic vs metal), and whether the box is new construction or a retrofit. Plastic junction boxes for indoor wiring cost 50% to 80% less than metal boxes but aren't as durable. An office might call for lighting layouts and data cabling, while an industrial space could need heavy-duty wiring and higher voltage systems. Here are typical cost ranges based on the most. Junction box costs range from low-price indoor models (\$10-\$60) to weatherproof units (\$70-\$450), with installation averaging \$100-\$300 depending on location and materials. If you're planning any electrical work, one of the small but important items on your list will be the junction box.
