

How to convert an FC controller to a USB interface

Overview

This is a converter adapter for use with a FC (New Nintendo) controller on a PC. Just plug it into the USB terminal and the driver can be installed, making it easy to use. Press and hold the button "START" and "A" on your controller for 3 seconds, the X/Y Axis and D-PAD can be exchanged. The FC controller that can be connected, is a controller type product that comes with the new AV specification, so please pay. If your FC has a broken USB port and can't connect to Betaflight (or INAV Configurator) and flash firmware, here are some fixes you can attempt to save your FC. Some of the links on this page are affiliate links. I receive a commission (at no extra cost to you) if you make a purchase after clicking. I'm doing a bit of up cycling hence I have a AIO minus it's mini C but I have to below.

How to convert an FC controller to a USB interface

First, I purchased several RS232 female connectors, then cut the pin head of the controller and started to wire them together. The wiring method is showed above.
