

How to open the outdoor server rack door

Overview

The door can now be opened by means of the raised handle. By pressing these pins downwards (for the upper pin) and upwards (for the lower pin), the door is released from the rack. The front door is heavy. Removing it requires two persons. Detach the top and bottom grounding straps by separating the banana jack. Pinch the two studs on the hinge toward the center. We just installed some AR3140 and AR3350 racks in a new company data center - actually had APC come out and set them up since it's a new building and we don't have personnel onsite yet. For some reason, they installed them as closely as possible (side by side in rows of 6 racks per row) - using the.
