How to plug in the green connector of the optical splitter

Overview

Plug the input fiber into the splitter's input port (marked "IN" or "E") and connect the output port to the end device. For Huawei FTTR splitters, note that the green port is the cascade port (not the uplink port) to avoid incorrect insertion, which may cause signal instability. Splitter Type: Choose a PLC type (uniform splitting) or an FBT type (non-uniform splitting). In this guide, we'll explain how to safely connect a splitter to another splitter, covering both fiber optic and coaxial setups. What Is a Splitter and Why Cascade Them?

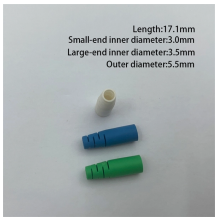

A splitter divides a single input signal into. Fiber optic splitter, also referred to as optical splitter, or beam splitter, is an integrated waveguide optical power distribution device that can split an incident light beam into two or more light beams, and vice versa, containing multiple input and output ends. Rotate the module d odules in the housing in the order shown by the routing ab he IBCTM Brand HC Cleaner Tool (p/n CLEaNER-PORT-2. It sits in an enclosure with the Battery Backup Unit (BBU) and associated wiring.
