Introducing Optical Cable Corporation's new Data Center Cabinet, providing mounting, storage, power, and cooling to equipment in any Data Center.

Choose from two-dimensional and isometric product drawings in PDF, DXF, VSS formats, and Building Information Modeling (BIM) Objects.

The entrance room is the interface between the access provider and the data center structured cabling. It houses the demarcation hardware and is outside of the computer room for security purposes.

The MDA houses the main cross-connect, the central distribution point for the data center's structured cabling system. This area should be centrally located to prevent exceeding recommended cabling ...

In modern data centers, where high-speed and high-density connectivity is critical, organizing fiber optic patch panels effectively is essential ...

Once cables are separated from the bundle, they must be managed to prevent the blocking of other equipment, restricting air flow, and maintaining equipment serviceability.

Installation guide for the Optical Cable Entry Facility (OCEF) cabinet. Includes specs, parts list, and step-by-step instructions.

View our fiber optic polishing product line including a comprehensive database of polishing blogs, tips, Q& A, news, videos and technical papers.

The room measures about 24 by 48 feet (7.3 by 14.6 m) and contains several racks of equipment, including a Narus STA 6400, a device designed to intercept and analyze Internet communications at ...

The communications connection to the outside world comes into the building through what is called a "service entrance" and is terminated in the main "equipment room" or "main cross connect" which ...

The FDH features front and rear hinged doors for easy accessibility and multiple cable hoops, cable clips and Velcro tie downs for neat and orderly cable management.
