

Intelligent Operation and Maintenance of ONU Optical Network Unit

Overview

That's likely an Optical Network Unit, or ONU. Managing these ONUs efficiently is super critical for internet service providers (ISPs) to deliver top-notch service. In the realm of Fiber-to-the-Home (FTTH) and other FTTx architectures, the Optical Network Unit (ONU) is a critical piece of customer-premises equipment (CPE). It acts as the essential bridge, converting the high-speed fiber optic signal coming into your home or business into a format that your. An Optical Network Unit (ONU) is a significant device in fiber-optic communication and plays a vital role in the Passive Optical Network (PON) infrastructure. It is typically situated at the customer's premises and serves as an interface between the local user network and the broader. Recommendation ITU-T G.
