Internet Active-Active Data Center

Overview

Active-Active, as the name implies, means that both sides are active online to provide services, as opposed to the traditional Active-Standby model. A true Active-Active solution should cover all levels of infrastructure, middleware, and applications. The most comprehensive interactive map and database of data centers across the United States. What Is a Data Center?

A data center is a facility used to. Hi, We all have some distributed setup of applications at our companies, especially those companies that deal directly with customers or provide financial services. But What is the need for having active-active and active-passive architecture?

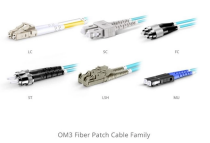

So, in this article, we are going to discuss these. Active-Active Data Center design – High Level Architectural Building Blocks Defining an active-active data-center strategy is not an easy task when you talk to network, server & compute teams who usually do not collaborate when it comes to planning their infrastructure. Configuring high availability on massive data networks demands precision and understanding. ACTIVEGREEN™ provides end users
