

## Israeli Fiber Optic Communication Lens

### Overview

Hezbollah has introduced a new, difficult-to-detect weapon against northern Israel: small drones controlled by fibre-optic cables. These devices, with cables the width of dental floss, are designed to evade electronic detection, posing a fresh challenge to air defences. The technology mirrors battlefield tactics from Ukraine and signals a change in drone warfare and military. Fibre-optic drones reshaped the war in Ukraine.

## Israeli Fiber Optic Communication Lens
