

Lithuanian optical cable loop

Overview

The ISRI project is transforming Lithuania's connectivity by installing 1,000 km of fiber optic cables and connecting 1,118 new users. This initiative ensures high-speed, reliable internet access, even in the most remote areas of the country. Fiber-optic networks. Workshop of Photonics (WOP) specializes in ultra-high precision micromachining, including fiber processing services that enable the production of specially designed shaped tip fibers. Their expertise in laser micromachining and custom optics positions them as a key player in the fiber optic cable. Since year 2003 Skaidula has started a new stage in company's development - the construction of fiber optic cable network and installation of communication cable ducts system. The main regions of the company's activity: Estonia, Lithuania, Latvia, Russia, Eastern Europe countries and CIS countries. The company has its own warehouse of.

Lithuanian optical cable loop
