

Low-voltage distribution box inspection

Overview

Regularly inspect Low Voltage Distribution Boxes every three months to catch problems early and avoid costly repairs. Always clean the boxes using safe methods. LV distribution boards, pillars and cabinets comprise of three main components: The. Installed in clean, well ventilated or air-conditioned locations, switchgear will require little routine maintenance. LV intrusive switchboards accept power from the utility & generator & distribute it to building circuits. Inspect the panel for physical damage/loss of components. Use crane / Forklift as applicable for.
