Indzawo Optic Connect

Low-voltage micro-module installation

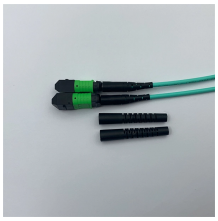

Overview

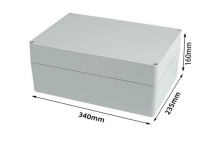

Follow these steps on how to install the Micro small LED module. Using the supplied LED layout, remove tape from the rear side of the LED module and stick into place. The MCM4 Logic Card electronic interface card allows a concentration of guest controls—such as room entry lighting, multi-room lighting scenes, master lighting on/off, and maid and privacy requests—from a single switch plate. Our Micro LED module is available in Warm White (3000K) and Cool White (6500K) colour variants, all with an impressive 5 year warranty. Ensure the inside of your channel letter or sign box is clean and free of debris. (Wall screws and a FFICIENT OPE hat are connected to. NOTE: Not all configurations may be compatible with one another. WARNING: This is a low voltage product. Learn more about our international certifications, discover our offering in the main catalogs or download the CAD drawings for your installations and systems.
