Made of West Asian Grid Cable Management System

	Our network design currently comprises 4 global regions across a single technology platform and seamlessly interconnects with partner networks to provide an integrated approach to service delivery.
	The Wyr-Grid® Overhead Cable Tray Routing System has been proven to reduce labor costs by 50% when benchmarked against existing wire basket and ladder rack systems.
	The resilience of the transmission system is primarily responsible for maintaining electricity and providing protection against increasing exposures from natural and man-made catastrophes.
