Optics & Photonics

# Indzawo Optic Connect

# OP710 Optical Power Meter

# OP710 Optical Power Meter

| | |
|---|---|
|  | Depending on the detector type, InGaAs (Indium Gallium Arsenide) or Silicon the spectral responsivity, the efficiency of the detector to convert optical power into electrical current, changes with wavelength. |
|  | NEW The OP710 is available starting at 8 up to 24 channels and can be configured for a variety of detector and connector interfaces. With the rack mount option multiple instruments can be com-bined ... |
|  | Multichannel Optical Power Meter The OP710 offers an economical approach for optical power measurement applications wh. re multiple channels are needed. Unlike other systems, this ... |
|  | Unlike other systems this instrument is built up with individual power meters allowing for unparalleled simultaneous data acquisition over all channels with a sampling rate of up to 10 samples per second. |
|  | OptoTest OP710 Multichannel OPM from OptoTest Reference: OP710-24-SI3 is available for purchase, calibration and repair. |

| | |
|---|---|
|  | Multichannel optical power meter with internal individual power meter modules for concurrent data acquisition with higher data acquisition rate. |
|  | The OP710 offers an economical approach for optical power measurement applications where multiple channels are needed. Unlike other systems, this instrument is built up with individual power meters ... |
|  | Unlike other systems this instrument is built up with individual power meters allowing for unparalleled simultaneous data acquisition over all channels with a sampling ... |
|  | The OP710 offers an economical approach for optical power measurement applications where multiple channels are needed. This versatile instrument is built with individual power meters allowing for ... |
