On-site Survey Form for Communication Optical Cables

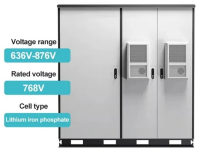

Overview

Streamline site assessments with the Telecommunication Site Survey Form Template from Template. Pre-construction site survey is one of the most important steps in the engineering and placement of a new optical cable. During this survey the placing supervisor will be able to observe any unusual situations that require special attention. It's about understanding the unique characteristics of your environment and tailoring your installation approach accordingly. It captures cable counts and lengths, outlet types, patch panels, and patch leads, plus fibre core sizes and connector options.
