

On-site Survey Form for Communication Optical Cables

Overview

Streamline site assessments with the Telecommunication Site Survey Form Template from Template. Pre-construction site survey is one of the most important steps in the engineering and placement of a new optical cable. During this survey the placing supervisor will be able to observe any unusual situations that require special attention. It's about understanding the unique characteristics of your environment and tailoring your installation approach accordingly. It captures cable counts and lengths, outlet types, patch panels, and patch leads, plus fibre core sizes and connector options.

On-site Survey Form for Communication Optical Cables

First, in order to prepare your property to connect to the Fiber Optic Cables, Mulberry Telecommunications has contracted Berry It Inc. to perform a site survey of your property.

As photos and drawings are necessary during the site survey, PoulSAT will put this request in writing to the relevant Customer representative to have its representatives take photographs.
