

On-site inspection of the distribution box

Overview

- Ensure the distribution box has a "Personnel Working" sign before inspection. Long. Is the distribution box intact and free of obvious damage?
- Is there any water or abnormal liquid around the box?
- Open the box cover and check if the inside is dry. Is the main switch in the correct position (usually ON)?
- Are the indicator lights for each circuit working properly (green. Forget cookie-cutter checklists - we're talking about the real, practical inspection points that determine whether a distribution box will perform flawlessly for decades or become an electrical hazard in five years. Inspect circuit breakers for proper operation. Ensure all connections are tight and secure.
