In this article, you will learn about cable tray joint plate manufacturing, its types, installation steps, and benefits. This will help you choose the best option for your project and ...

Black PVC joint plate for splicing or covering the gaps between individual covers along the length of a cable tray. Black PVC joint plate connects or covers gaps in cable tray covers.

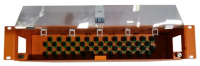

The wall penetration sleeve is a 24” long pan with wall flanges, cover & cover screws, that allows tray to be connected on both sides of the wall. Gaskets and sealants (not included), may be applied in the field.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.
