Peru Level 3 Distribution Box

Overview

Install the Level 3 surge protection device inside the equipment or at the equipment's power supply input, especially for critical or sensitive electronic devices. Technical Requirements Maximum discharge capacity: 20kA per phase or lower. Voltage protection level: ≤ 1800V. With an IP>65 rating, the OPD-85/3L model is an example of advanced distribution box technology. It completely blocks dust from getting in and can withstand water jets from any direction. This waterproof solution for electrical distribution has a body made of one-piece injection molding and. Let's make a hypothesis: a newly built residential area introduces a 10kV incoming line and builds a distribution room. It integrates power distribution, protection, and monitoring capabilities, and is responsible for distributing power to entire commercial or residential. The underground transformer is a new type of compact substation equipment that combines a transformer, high-voltage load switch, fuse, and other components. According to the principle of graded lightning protection, and based on the likelihood of a building being struck by lightning, it is necessary to.
