All Dielectric Self-supporting ADSS Fiber Optic Cable A type of fiber optic cable that is strong enough to support itself between structures without containing conductive metal elements. ADSS fiber optic ...

Our products have been distributed and served to several cable television company in the Philippines. Equipped over 25 years of technical expertise, enabling us to handle the demands of our customers.

All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements.

Fibers are positioned into a loose tube made of high modulus plastics. The tubes are filled with a water-resistant filling compound. The tubes (and fillers) are stranded around FRP (Fiber Reinforced Plastic) ...

As its name indicates, there is no support or messenger wire required, so installation is achieved in a single pass, making ADSS an economical and simple means of building a fiber optic network.
