Photovoltaic Module Testing Organization in Democratic Republic of Congo

Overview

IZUBA is a solar energy company established in the Democratic Republic of Congo and headquartered in Goma / North-Kivu, that specializes in EPCM (engineering, procurement, construction and management) services for grid-tied and off-grid / mini-grid solar PV projects. These include solar components (solar panels, inverters, batteries), off-grid and grid-tie solar systems for commercial, industrial and residential applications, battery energy storage systems, energy efficient LED. What is a PV Module Tester?

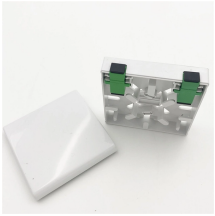

An Array Outdoor Tester measures the output voltage and current of PV arrays to check the power output. Outdoor testers are high-tech calibrated devices that measure even the slightest difference in power output from any of the arrays in a Solar plant. It is planned in Katanga, Democratic Republic of the Congo. Nuru deployed Congo"s first solar-based mini-grid in.
