Plug-in type optical splitter models

Overview

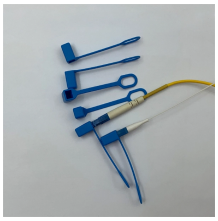

Different networking applications require different types of fiber optic splitters. Multilink offers four types of splitters to choose from: 1. PLC splitters: Our PLC splitters are compact and feature 55 dB directivity. With accurate connecti. Different networking applications require different types of fiber optic splitters. Multilink offers four types of splitters to choose from: 1. PLC splitters: Our PLC splitters are compact and feature 55 dB directivity. With accurate connection and low signal loss, these splitters work well with larger split configurations and are compliant with Te. As telecommunications companies bring fiber optic cable ever closer to individual subscribers, they rely on a range of tools to increase network efficiency. Fiber optic splitters make up an essential part of any service provider's toolkit by allowing technicians to split a single optical signal between multiple fibers, an important step when creati. Multilink's fiber optic cable splitters come in a number of different configurations, but we also understand that many telecom companies have unique requirements for their network components. If you have a product in mind and don't see a comparable splitter in our collection, our engineers can create a custom design to align with your vision. When. With more than 35 years of
