The Controller Card enables you to individually switch any port from the front panel, or gang switch the entire system. With the intelligent card, you can also switch using SNMP or an RS-232 connection.

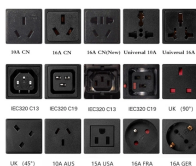

Switch any port from the chassis' front panel or gang switch the entire system. Shop Black Box now.

SwitchMaster ® 4U ganged A/B switches are compact multi-switch systems in a 4U high rack-mount chassis.

You can switch one card individually or gang switch the entire rack. The system is scalable, capable of daisy-chaining multiple chassis to control up to 4080 individual ports.

The RJ45 CAT5e A/B switch latching card allows for the switching between two Ethernet connections with speeds up to 1 GbE, if power is lost the connection will default to the A location.

Unlike the traditional method of installing a kill-switch, our system/kit does not cut into any of your factory's systems. Our bypass module acts the same as if you popped your hood and physically ...
