Price of Japanese Fiber Bragg Grating Piezometer

Overview

Bare fiber temperature sensors offer the most economical option for applications where direct fiber installation is feasible. Packaged temperature sensors with protective housings command higher prices but provide enhanced durability and easier installation in harsh industrial. A fiber Bragg grating (FBG) is a microstructure typically inscribed in the core of a single-mode optical fiber, consisting of a periodic variation in the refractive index. The pricing structure varies considerably between bare fiber FBG sensors and packaged configurations. As temperatures rise or fall, the grating's reflection.
